TURN YOUR WALL INTO A RAMP
ALPAS EURO
Introducing the ravishing beauty of home decor that is creating a new dimension of fashion where none existed.
Welcome to this world of niche fashion that will redefine experience, break boundaries beyond your wildest imagination and relegate every other element of furnishing into irrelevance at worst or make them look like prehistoric relic at best. It will flame such a passion for fashion in you that you never knew existed.

BRAZIA STONE

The wide world of woods is appealing, alluring and fascinating beyond words. It can take you on a ride of euphoria and bliss. Besides, its wilderness is spectacular. Now imagine getting the same belongingness, right in your space. Beautiful it would be! To satiate this quest of yours, we are here with a pattern of quirky shapes pigmented in the shade of wood color, brown. Its view would be your perfect get away from the ruckus of the sedentary lifestyle.

MAGIC BLACK

There is a microscopic world all around and inside us to which we are a macrocosm. Anyone who has used an electron microscope zoomed in on a spick-and-span glass would exclaim 'My God! There is an entire universe out there!'

This design is a tribute to that microcosm that makes us possible, to that invisible world rendered inexistent by our limitation. This design is a magnifying glass that tells you that small is big and inspires you to seek joy in the small. No wonder we call it 'Magic'.

COPPER GRACE

Call it fashion or fad but colouring your hair is definitely the in thing now. Our design of Copper Grace is inspired by fashion that is focussed on such hairdos.

It has streaks of burning copper interspersed with perms of flaming gold on a bed-rock of jet black natural hair spread over a vast canvas of opaque. Let our décor aficionados fashion the couture for your walls.

FOSSIL GOLD

As a tribute to the liquid gold, we decided to dedicate one design to the inspiration from the fossils. In the sepulchral terrain of intermittent rocks fossilized by the detached passage of time, we bring pre-historic relic to your walls.

Let the anachronism of primitive history in your modern life ignite an animalistic passion for fashion in you that was hitherto unknown even to the wildest part of you.

Agani Gold

There are not many elements on Earth that attract the human eyes and desires like gold. Gold and its shades are known for its eternal love and passion.
To properly capture the enigma of gold and its allure, we crafted a surface that doesn't disappoint. With shades of blue, black and orange to complement shades of gold, this tile perfectly depicts the properties that make gold such a desired color and element.

ELECTRIC BLUE

It's almost unimaginable to have an ensemble
collection of any sort that does not include a blue,
the colour of Earth, or its shade.
And we don't intend to make an exception to this rule.

Since blue reminded us of Earth, we mashed the colour with tinges
of green and dashes of black and their shades to give
it a feel of rugged earthy landscape clearly showcasing green
valleys and naked mountains dotted by water bodies
as if seen from the not so far outer space.
This is earthy fashion at its very best.
